Backup Database (SUSDB):
Your SUSDB database is on a remote SQL server [SQLREMOTE]. WSUS Automated Maintenance cannot backup a remote database.
You should have some other method of backing it up. Please change the WAM Configuration to disable backing up the database.

WSUS Automated Maintenance Scheduled Task Installation:

TaskName : WSUS Automated Maintenance
State    : Ready

!!! SECURITY AWARENESS ALERT !!!

Your SQL server has been detected as a REMOTE SQL server. In order to run our scheduled task on
a remote SQL Server, the computer object's active directory account [DOMAIN\SQLREMOTE$] needs
to have permissions on the SUSDB database on SQLREMOTE. Since WSUS is already installed and
running, this account is already setup in the SQL server and already granted rights inside of
the SUSDB database, so all we need to do is add the account to the correct role. Unfortunately,
in applying the principle of least privilege, it must be db_owner and not the db_ddladmin role.
